Disposition of Claims

- ☒ Claim(s) 1-29 is/are pending in the application.
- Of the above claim(s) _____ is/are withdrawn from consideration.
- ☐ Claim(s) _____ is/are allowed.
- ☐ Claim(s) _____ is/are rejected.
- ☐ Claim(s) _____ is/are objected to.
- ☒ Claim(s) 1-29 are subject to restriction or election requirement.

Application Papers

- ☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.
- ☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.
- ☐ The drawing(s) filed on _____ is/are objected to by the Examiner.
- ☐ The specification is objected to by the Examiner.
- ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119 (a)-(d)

- ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).
 - ☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been received.
 - ☐ received in Application No. (Series Code/Serial Number) _____

Office Action Summary

Art Unit: 1754

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a catalyst, classified in class 423, subclass 448.
- II. Claims 6-10, 25-29, drawn to treating catalyst with gas, classified in class 423, subclass 418.2.
- III. Claims 11-19, drawn to chemical processes, classified in class various, subclass various.
- IV. Claims 20-24, drawn to isomerization, classified in class 585, subclass 1+.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used to isomerize hydrocarbons.

Groups I and III also share this relationship. The catalyst can be used to make CO.

Groups I and IV also share this relationship. The catalyst can be used to make CO.

Groups II, III and IV in their various permutations and combinations are subcombinations usable together. The catalyst may be used in other ways, such as making CO or isomerization.

If Group III is elected, then applicant must elect and single disclosed specie of chemical reaction.

It is noted that claims 6 and 25 recite the same steps but use different preambles. If these claims are amended- or argued- to be different, then accordingly they will be further restricted. If they are intended to be different, applicant should so state in their next response, along with appropriate amendment or argument. Failure to do so will be taken as acquiescence to the position stated in this Office action.

Art Unit: 1754

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
